

BIA Stenen

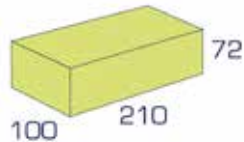

De vuilwerk- of schoonwerkstenen zijn er in verschillende druksterktes. De lichtbeton stenen hebben een druksterkte van 15 N/mm². De klinkers verdragen 20 N/mm². Beide stenen zijn geschikt voor (dragende) binnenmuren, scheidingswanden en buitenmuren.

Uiteenlopende afmetingen

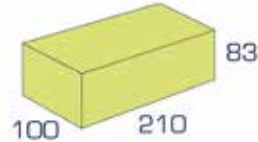

De meest gangbare afmetingen zijn: WF (WaalFormaat), AF (AmstelFormaat), MF (MaasFormaat 10/8.3 / 12/8.3), DMF (DubbelMaasFormaat), NF (NormaalFormaat), 2DF (DubbelFormaat) en MDF (ModuulFormaat 9/9 en 14/9).
